

HEALTH & SAFETY COVID-19 SOLUTIONS

ENSURING A SAFER TODAY, AND A BRIGHTER TOMORROW.

THE CHALLENGE

South Africa will have lost school days as a result of the Covid-19 pandemic and subsequent lockdown. This short-term intervention has had severe impact for schools and tertiary institutions in SA who have resorted to online teaching. Most South African students and learners do not have access to the internet and devices, with the result that, over the longer term, these interruptions to learning could increase inequality.

At Thorburn Security Solutions, our priority is to support the education system with innovative new products and services that will allow children, students, teachers and lecturers to return to schools and other educational institutions safely and with their health and wellbeing at top of mind.

- Live view
- Displays temperature results
- Prompt alarm

THE BENEFITS

- Through early warning detection, we can identify and control COVID-19 in schools and other educational facilities and prevent its further spread in communities, thereby helping to flatten the curve in South Africa.
- Peace of mind: Parents and caregivers can return their children to their educational environments, knowing that their safety is a top priority.
- Tsebo will assess the risks and needs of individual schools and campuses to create tailormade early detection and cleaning and hygiene solutions.
- Tsebo will provide clear and actionable guidance and training to ensure the safe and effective operation, through hygiene interventions and early detection.
- The knowledge that you will be providing a safe and healthy environment by deploying early warning detection process which will allow you to identify possible risks and threats from COVID-19.

THE SOLUTION

Early detection of Covid-19, and the subsequent isolation and treatment of the person affected, is the only line of defense against the virus for now.

While it is important that the educational environment continues to be a welcoming, respectful, inclusive and supportive setting it is essential to detect, identify and isolate persons who may have contracted the virus BEFORE they enter any campus, school or facility to maintain a safe and virus-free institutions.

Tsebo Cleaning and Hygiene Solutions is well equipped to offer specialised deep-cleaning services to help your organisation reduce risks in line with guidelines from the National Institute of Communicable Disease – from full-service hygiene solutions to the deployment of specialised COVID-19 cleaning teams, to clean and disinfectant buildings internally and externally, both prior to schools and other facilities re-opening as well as during occupation.

To mitigate risk and assist in creating a sustainable educational environment, it is of utmost importance to focus on precautionary measures to prevent the potential spread of COVID-19.

We have deployed the following new products and services to cater for your specific needs:

Early Warning Temperature Detection

- Integrated CCTV Thermal System
- Hand-held Thermal Fever Detection
- Standalone Thermal Fever Detection Units
