

SECURING FUTURES THROUGH COMMUNITY IMPACT

Thorburn Delivers Meaningful Support to Mpumalanga School

Thorburn Security Solutions, a Tsebo Solutions Group company, continues to demonstrate its commitment to community upliftment through a recent donation to Sikhulile Secondary School in Mpumalanga.

In March 2026, Thorburn provided 100 chairs to the school, directly addressing a critical infrastructure need for its 740 learners. As a no-fee paying institution, Sikhulile Secondary School faces ongoing resource constraints that impact the learning environment and overall academic experience.

The donation has had an immediate and tangible impact. Learners who previously lacked adequate seating are now able to participate in lessons with improved comfort and focus. According to the school's leadership, the contribution has not only delivered practical support but has also boosted morale among both learners and educators.

Visuals from the handover highlight the significance of the initiative, with large groups of learners gathered alongside newly delivered chairs, symbolising both need and opportunity. Classrooms that were previously under-resourced are now better equipped to support effective teaching and learning.

This initiative reflects Thorburn's broader commitment to creating safer, more supportive environments beyond traditional security services. By investing in education, the business is contributing to long-term societal resilience and development.

Partnerships such as this highlight the role that corporate organisations can play in enabling access to quality education. For Thorburn, it is not only about protecting spaces, but about empowering the people within them.

As the relationship with Sikhulile Secondary School continues, Thorburn Security Solutions remains focused on delivering impact where it matters most, reinforcing its position as a purpose-driven organisation within the Tsebo Solutions Group.
